

Welcome to
Smart and secure home

What's the SMART HOME ?

The way that makes all your devices connected together providing you full control all over your home from anywhere. Almost all electrical device and system in your home can be automated.

With one touch you can **dim lights, control Air conditioner, TVs, computers, audio & video systems, play music, turn up the heat, security system and lock the doors.**

You have 4 types of control: **Smart Wall keypads, Smartphones, Tablets or Voice Command** from any location through the internet. Or, you can set the schedule according to your personal preferences without touching anything.

Smart Home provides you:

- ▶ Remote Control.
- ▶ Monitoring.
- ▶ Safety.
- ▶ Energy.
- ▶ Efficiency.
- ▶ Convenience.
- ▶ Peace of Mind.

Solutions

Light Control

The light is automatically on when you entered the room.

Reduce the number of times you reach for the switch to turn on/off the light and also helps you to **reduce energy consumption.**

You can control the intensity of the light (lower or higher the brightness) by using dimmer device.

AC Control

AC can be accessed from anywhere anytime, AC can either be automatically or manually controlled

The AC's automatically off when the place is empty. It helps you to **reduce energy consumption.**

Solutions

Security Control

CCTV camera system, can monitor and alarm immediately for the weird or unwanted situation by **sending SMS message, calls or alarm to a specified person** to ask for help.

Safety and security inputs: Door/Window contacts, Break Glass Detector, Shock, Smoke and Gas detector.

Shading Control

The motorized curtain or tubular motor can be easily controlled. It supports open, stop, close and percentage control.

The blinds can be scheduled to lower and raise at certain times of day.

The blinds close automatically when you leave home.

Solutions

Entertainment Control

The Wireless IR Emitter is designed to transmit IR signal, which enables wireless control over all home appliances, such as TV, receiver, music control, etc. (supports 100 learning IR codes).

Your whole house or individual rooms welcome you as you walk in, playing your favorite playlist, internet radio or Specify on entry. When you leave, the audio will automatically turn off.

Smart Home system
is an innovation life.

BENEFITS

Safety

Worried that your kids didn't lock the doors before they ran off to play?
From your smart phone you can control everything on your home anywhere.

If your security network detects a threat, the system can be programmed to immediately sound an alarm, notify the emergency services and send a message to your phone.

As you leave home, garage doors and gates automatically close and alarms activate.

Energy Saving

Increase your home's energy efficiency by automatically powering off systems and appliances when they aren't in use. **When the home is automated, it saves at least 30% of energy.**

BENEFITS

Convenience

Indoor & Outdoor Control: Connected devices can create a comfortable atmosphere by providing intelligent and adaptive control over lighting, sound, temperature, pool and spa by turn on the heat or set the temperature and automate your sprinklers and lawn systems to respond to weather conditions

Intercom: With smart intercom, you will never miss a visitor. It's as simple as that you **speak with your visitors face to face**; the system has a built-in camera and motion sensor. **Open the door by your smartphone from anywhere**, after watching who is on the door.

Centralized Control

Simply pick up your Android or IOS device, with a single touch you can dim the lights, turn on the television, raise the temperature, close the curtains, and lock your doors from anywhere. You can even allow children to configure the home according to their wishes.

BENEFITS

Peace of Mind

No more worries about turning off the lights, locking the door or turning off the television. With a single touch on your portable device, you can verify remotely with an application.

With Infinity Control,
your house is more than
a home, it's a future investment.

Some scenarios of what you will be able to do

Good morning Mood: Simply say Good Morning to turn off all lights, open shutters and play your favorite music.

Away Mood: When everyone leaves home, all lights, TV's, AC's, shutters will turn off automatically and If there's a security unwanted situation, alarm sirens will play, sending SMS message, calls to a specified person and the cameras will start recording.

Reading Mood: Set up the perfect lighting for your reading, play some background music.

Relax Mood: Set up the perfect atmosphere for relaxation through lighting, air conditioning, heating and music.

Good Night Mood: lights, TV's, AC's, shutters will turn off automatically without pressing a button and lock your door.

It can be easily customized
according to the client's wish.
